

The Best Book

Of course the best book is the Bible. The man who said the best book was the pocket book, tried to say something smart and failed.

A bank book is a better book than a pocket book. The thief might steal your pocket book, or you might lose it in many ways. It's gone for good, too. But in case of accident we will gladly supply you with another bank book and your funds will always be secured in our bank. Place your dependence on a bank book in preference to a pocket book every time. We will furnish you a nice one free any time you wish to open an account.

Beautiful Bust and Shoulders are possible if you will wear a scientifically constructed Bien Jolie Brassiere. The dragging weight of an unconfined bust so stretches the supporting muscles that the contour of the figure is spoiled.

DAIRY

RINSE UTENSILS AFTER USE

Prevents Water in Milk From Evaporating and Solid Matter Sticking to the Vessel.

The first important rule to observe in cleaning dairy utensils is to rinse them immediately after use. This prevents the water in the milk from evaporating and the solid matter sticking to the utensil. If it is impossible to wash the utensils at once rinse them in cold or lukewarm water, so that the most of the milk will be removed before it has a chance to stick. Hot water should not be used until the milky substances have been removed with cold or lukewarm water, for the hot water will coagulate the casein in the milk so that it will stick to the tin and require a greater amount of washing before it can be removed.

After rinsing in cold or lukewarm water wash the utensils in hot water. Cold or lukewarm water is practically worthless for cleaning purposes. Use some standard brand of alkali washing powder with the hot water. The alkali powders are more desirable for the work, since they quickly and efficiently remove the milk from the tin. Powders or soaps that have grease as part of their composition do not give as satisfactory results as the alkali powders.

PUREBRED SIRES FOR DAIRY

Nowhere Does He Come So Near Being All-Important—Adds Profit to Ordinary Paying Herd.

The value of the purebred sire for every class of farm livestock is coming to be universally recognized, but nowhere does he come so near being all-important as in the dairy. In one full generation the herd header can destroy what has been years in developing in the dairy herd, if he is not of the right kind. If of the right type and breeding he can add to the ordinary paying herd that which will make it yield a handsome profit or to a highly profitable herd a higher profit still.

Haphazard methods of breeding will not produce a bull of highest quality. He must have quality ancestry on both sides and the only ancestry known to be reliable is one whose history is registered and recorded. Blood will tell, and nowhere does it speak more emphatically than in the dairy herd. The female descendants of a scrub cow consistency bred back to a purebred bull will in a few generations become purebred themselves to all intents and purposes, but each succeeding genera-

tion descending from a purebred cow and a scrub bull and bred again to scrub stock will continue to decline and the offspring of the first cross is likely not worth its keep.

If dairymen could see in the concrete sense the millions of dollars which the consistent use of nothing but purebred sires would bring to the dairy industry within ten years' time, the mission of the apostles of better breeding would be once and for all fulfilled. A purebred sire is undoubtedly the most profitable and at the same time economical investment which the dairy farmer can make.

MILK FOR NEWLY BORN CALF

Young Animals Should Receive From Eight to Ten Pounds Daily, Depending on Size.

The newly born calf should receive from eight to ten pounds of whole milk daily, depending upon the size and strength of the animal. The milk gradually can be displaced by skim milk until when four weeks old the calf is receiving no whole milk. Experiments and farm practice unite in commending the use of skim milk.

Good Manners Help.

A merchant who returned from England just before the war broke out had been voluble ever since on the manners of the children he happened to meet abroad. Apparently American parents and schools do not lay on good manners the emphasis that they receive abroad. Yet good manners, like the gold at the foundation of all money, are current the world over. Emerson noted this: "Give a boy dress and accomplishments and you give him the mastery of palaces and fortunes wherever he goes. He has not the trouble to earn or own them; they solicit him to enter and possess." "All your Greek," Chesterfield wrote to his son, "can never advance you from secretary to envoy, or from envoy to ambassador, but your address, your air, your manner, if good, may." "The difference between a well-bred and ill-bred man is this," Samuel Johnson said. "One immediately attracts your attention, the other your aversion. You love one until you find reason to hate him; you hate the other until you find reason to love him." Civility, polished manners, mean much to a youth in his first position.—Kansas City Star.

Gov. Stanley reviewed the troops and made a speech to them Thursday, at Ft. Thomas.
